In the abstract, line 5, replace "comprises" with --including--.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the structure of claim 1. More specifically, the prior art lacks the combination of a rivet head elevated with respect to the first blade and a cover, wherein the cover includes three different thicknesses for maintain the cover on the cutting device. The cover further includes a rivet head channel and rivet head receiving slot for allowing the cover to engage the rivet head in a frictionally manner.

Miriello is being cited to show additional similar device with a cover of two different thicknesses; however, Miriello lacks the raised rivet head, the rivet head channel, and the rivet head slot.

Ohmura and Melter et al. both disclose scissor covers with rivet head channels and receiving slots but both lack the three different thicknesses for frictional engagement between the cover and the cutting device.
